SECTION 00900 MISCELLANEOUS ATTACHMENTS

QUESTIONS AND ANSWERS TO W9128A-04-R-0015

Q1. Under General Requirements Section 1.0, Paragraph 3, it states mitigating the boulders listed and 2 rock cliffs approximately 100 feet long and 55 feet high as shown on Figure 4.

A1. Yes, to confirm, scope involves mitigating boulders and 2 rock cliffs, Cliff Area #1 and Cliff Area #2.

Q2. Figure 3 shows 4 additional rock outcroppings. Are these to be mitigated also?

A2. No these identified rock outcroppings are not included in this scope of work.

Q3. Figure 4 shows a total of 4 separate rock outcroppings which are much longer and higher than stated in Paragraph 3 of Section 1.0. Please clarify if all of the locations in Figure 4 are to be mitigated.

A3. Only two areas Cliff Area #1 and Cliff Area #2 are included in this scope of work.

Q4. Figure 5 shows 1 rock outcropping. Is it to be mitigated?

A4. No work is required on Figure 5 (Cliff Area #3)

Q5. In order to mitigate these areas with proven Rockfall Mitigation methods, the areas will require extensive clearing of vegetation. Is this allowed or must we work around the existing vegetation?

A5. Minimal clearing to install protective structures may be acceptable and will be determined in the field. Clearing of heavy vegetation (i.e. trees) will not be permitted.

Q6. I still need some clarification as to what work is to be done with what is termed Cliff Area 1. Figure 4 shows 4 separate lines of rock outcroppings. Cliff Area 2 one would assume is the approx. 100' section next to the writing on the figure Cliff Area 2. Cliff Area 1 is not so clear, could you please clarify which part of the rock outcroppings are to be mitigated is it a 100' section or which part of the sections shown is it?

A6. Please see the attached pictures for clarification on Cliff Area #1 (2 Pages).
